As Covid pandemic started its journey in India its impact on population has been much more but to contrast to rest of states J&K has shown alarming cases as it was low in Jan . Till July the correlation results has shown that Mortality Rate has equilibrium result correspondet to Recovery rate. As per ICMR report there has been delay test conducting as no proper source of equipment dully provided.

Common symptoms flu to high risk disease target the elders and people vulnerable to this virus. Hence, as predicted cases will rise more in coming days. It is advisable to follow preventive measure and folllow govt guidelines.

"STAY INDOOR STAY SAFE"
